EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 6, after line 23, insert the following:

BRIEF DESCRIPTION OF THE FIGURES

FIG. 1 shows the concentration of LSP in the CSF patients with and without brain tumors. It can be seen that the concentration of LSP is significantly higher in patients with malignant primary brain tumors and metastatic brain tumors as compared to those with benign primary brain tumors, systemic malignant tumors without brain metastasis, and neurologic controls (dizziness, headaches, strokes, lyme disease, alzheimers and HIV).

FIG. 2 shows the correlation of LSP in longitudinal studies of patients with brain tumors under radiation and chemotherapy.

FIG. 3 shows the significantly increased concentration of LSP in the CSF of patients with malignant primary brain tumors and a much lower concentration in patients with benign primary brain tumors.

FIG. 4 compares the increased concentration of LSP in the CSF of patients with metastatic brain tumors versus patients who do not have metastatic brain tumors.

FIG. 5 shows the higher concentration of LSP in the CSF of patients with lymphoma and a much lower concentration in patients with HIV and toxoplasmosis.

FIG. 6 charts the concentration of LSP in the CSF of control samples (dizziness, headaches, strokes and the like), of neurological samples (lyme disease, Alzheimer's, Meningitis) and of samples from patients having malignancies in different stages.
